

Thermalon II®

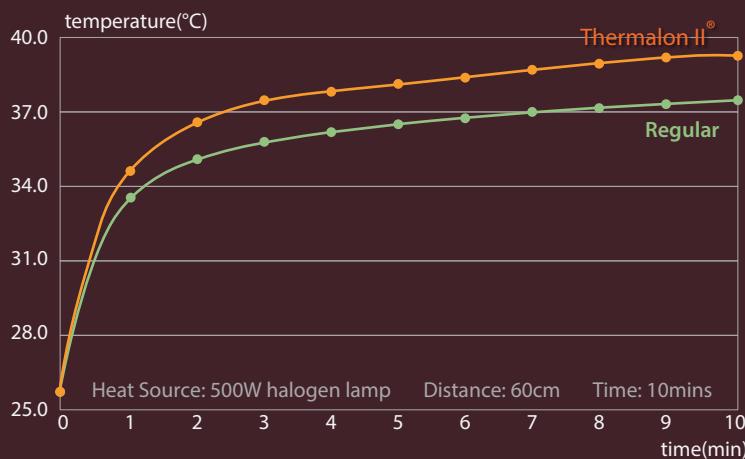

Dyeable Heat Warm Nylon Yarn

Thermalon II® is the nylon 6 yarn with natural mineral additives and can convert the body moisture to natural heat. By this modified chemical, the heat is retained anytime and suitable for any colors of dyeing.

Comparison of the temperature rising curve

Specification

- FDY: (15~800)D / (5~196)F
- DTY: (10~340)D / (5~96)F

Features

-  100% natural mineral and skin-friendly
-  Permanent effect and unaffected by washing
-  Good heat insulation from body temperature
-  Micro particles absorb body vapor and provide comfort
-  Similar to regular nylon dyeing (white nano additive)

Application

-  Underwear, sports & casual wear
-  Swimwear
-  Bedding
-  Hat, scarf, gloves, and socks
