Ecoya®
環保原液染色纖維
Water for living, not for dyeing
Ecoya® 是一種環保原液染色紗線。
在聚合物熔融階段即加入色母粒，再擠製成纖維，
大幅省略傳統染色製程，有效降低用水、
能源消耗及碳排放，是兼顧品質與環保的永續選擇。
Ecoya® is a type of solution dyed yarn.
Most of the dyeing process is omiteed
as the color masterdatch is added to the
polymer melt before it is extruded into
fiber. It's great for the environment.
節能減碳
Energy saving
優異的耐水色牢度
Superior colorfastness to water
優異的耐光色牢度
Superior colorfastness to light
降低二氧化碳CO2及化學需氧量COD排放
Reduced CO2 and COD emissions
Color reproducibility
